Joffy Maria Pius

COMPUTER SCIENCE & ENGINEERING STUDENT

Developer · UI/UX Enthusiast · Creative Problem Solver
joffymariapius06@gmail.com · github.com/Joffy-Maria · linkedin.com/in/joffy-maria-pius-0jo6

SUMMARY

Computer Science and Engineering student at Viswajyothi College of Engineering and Technology, passionate about technology, creativity and building meaningful digital experiences. Interested in web development, machine learning, UI/UX design and problem-solving, with a focus on applications that are technically effective and intuitive to use.

EXPERIENCE

Intern · Infosys Springboard

2 MONTHS

- Completed a 2-month internship at Infosys Springboard, during which ImpactSense was built — an earthquake prediction and visualization platform.
- Preprocessed seismic datasets, engineered features and trained machine-learning models (Random Forest, Gradient Boosting) with Python, Pandas, NumPy and scikit-learn.
- Built an interactive visualization interface with React and Tailwind CSS presenting model performance analysis.

SKILLS

LANGUAGES	Python, C, Java, JavaScript, TypeScript, HTML5, CSS3
FRONTEND	React, Next.js, Tailwind CSS, Responsive Design
ML & DATA	NumPy, Pandas, scikit-learn, Machine Learning, Data Visualization, Model Evaluation
TOOLS	Git, GitHub, Figma, Supabase, Firebase, VS Code
INTERESTS	UI/UX Design, Data Structures & Algorithms, Problem Solving, Creative Development

LEADERSHIP & ACTIVITIES

- Student Convenor, Institution's Innovation Council (current)
- Class Representative, B.Tech Computer Science & Engineering, academic year 2026 — 2027
- Curator, TEDxVJCET — January 2026
- Prizes for group song at the Arts Fest
- Active member: Google Developer Groups · TinkerHub · TEDxVJCET

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science and Engineering

Viswajyothi College of Engineering and Technology
A P J Abdul Kalam Technological University · 2024 — 2028 · CGPA 9.38 / 10
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Theory of Computation

PROJECTS

LifeLink QR — Smart Medical ID in a QR Code

lifelink-qr-f98c6.web.app

- Built a privacy-conscious emergency medical ID web app for a Google Developer Groups hackathon; client-side QR generation with no centralized database.
- Implemented Base64-encoded emergency payloads, a high-contrast emergency dashboard, instant decoding and one-tap emergency calling.
- Built with HTML5, Vanilla JavaScript, Tailwind CSS, qrcode.js and Firebase Hosting. Source: github.com/Joffy-Maria/gdg.

ImpactSense — Earthquake Prediction & Visualization

github.com/Joffy-Maria/ImpactSense

- Built during a 2-month internship at Infosys Springboard; preprocessed seismic datasets and engineered features with Python, Pandas and NumPy.
- Trained and compared Random Forest and Gradient Boosting models with scikit-learn and evaluated model performance.
- Built an interactive visualization interface with React and Tailwind CSS.

ClearSpeak — Assistive Communication Web Application

clearspeak-three.vercel.app

- Built an assistive communication web app with Next.js, TypeScript, Tailwind CSS and TensorFlow.js; live captions, quick replies and saved transcripts via the Web Speech API.
- Persisted transcripts with IndexedDB and automated PDF export with jsPDF. Source: github.com/Joffy-Maria/clearspeak.

Promate — Real-Time Collaborative Pomodoro

pomodoro-rouge-theta.vercel.app

- Developed a real-time collaborative Pomodoro web app with a shared synchronized timer, shared task list and in-room chat.
- Rooms require no signup and disappear when the session ends. Source: github.com/Joffy-Maria/pomodoro.

SkillDev — Placement Preparation Platform

skill-dev-h5n8-brown.vercel.app

- Built a dark-themed placement-preparation platform for coding clubs with Next.js and TypeScript; daily coding challenges, verified platform submissions, an interactive leaderboard podium, study materials and interview preparation.
- Implemented role-based sign-in for students and coding-club placement leaders. Source: github.com/Joffy-Maria/SkillDev.
